PROFESSIONAL SUMMARY

Python Developer with 1.5+ years of experience in ML, FastAPI, and full-stack develop and nt. Proficient in Python, NumPy and Pandas. Contributed in many production features.

TECHNICAL SKILLS

- **Python Programming:** Python 3.x, OOP, Multithreading Basics, Exception Handling, Scripting & Automation, PyTest, Virtual Environments (venv/pip)
- **Python for AI/ML:** NumPy, Pandas, Matplotlib, Model Training& Evaluation, Data Preprocessing, Feature Engineering, FastAPI
- **Other Languages:** Java, JavaScript, SQL
- **Web & Backend:** React.js, HTML5, CSS3,
- **Databases:** MySQL, SQL
- **Tools & DevOps:** Git, GitHub, Postman, Bootstrap, Jira, Agile/Scrum
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, SDLC, STLC

PROFESSIONAL EXPERIENCE

Apprentice | American Express

January 2026 - Present

- Upgraded to Vert.x 5.1.3 and migrated distributed tracing from OpenTracing to OpenTelemetry.
- Migrated the Ditto template database to Firefly Database, ensuring 100% continuity across services
- Engineered an internal skill-suite automating 5 workflows: PR creation/review and Jira RT creation, review, and fix.
- Created automated vulnerability-reporting scripts, generating real-time reports across 50+ tracked services.
- Increased test coverage of an event-driven backend module from 20% to 100% by writing 20,000+ lines of Java using the Reflection API.
- Automated regression testing for microservices, achieving 100% validation of critical APIs.

Frontend Developer | Indian Infotech

January 2025 - November 2025

- Designed 10+ reusable React.js components using HTML5, CSS3, and JavaScript for scalable, responsive UIs.
- Integrated 8+ REST APIs and shipped features across 10+ Agile sprint releases with cross-functional teams.

Artificial Intelligence Intern | Acmegrade

April 2022 - June 2022

- Trained a Python-based ML model using NumPy, Pandas, and Scikit-learn, achieving 90% prediction accuracy
- Performed data preprocessing and feature engineering on 1,000+ records, improving model input quality.

PROJECTS

Handwritten Digit Recognition

- Implemented a real-time digit recognition model in Python/Deep Learning, trained on 60K+ MNIST images.
- Reduced inference latency by optimizing preprocessing and deployed it for 2 automation use cases.

Co-Exist: Sustainable Living Platform

- Delivered a full-stack web platform with secure authentication, personalized dashboards, and 3+ core modules.
- Launched an analytics dashboard tracking 5+ user activity metrics to support data-informed decision-making.

EDUCATION

United College of Engineering & Management, Allahabad

Bachelors of Technology in Computer Science and Engineering

2020 - 2024

CGPA: 7.99/10 | Certificate of Excellence in Department

CERTIFICATION

- Python Full-Stack Developer — DUCAT
- Google IT Support Certificate — Coursera (Google)
- Core Java & Machine Learning — Summer Training Program

LEADERSHIP AND ACHIEVEMENTS

- Class Representative for 4 consecutive years, coordinating 60+ students and faculty.
- Delivered 5+ technical presentations at college events and competitions; led 3+ technical projects from requirement analysis through deployment.
- Solved 100+ coding problems on Leetcode
