PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building 3+ full-stack web applications using React.js, Java, and MongoDB. Reduced database query latency by 20% and page load times by 25% through optimized REST API design and performance tuning. Strong foundation in Data Structures & Algorithms (DSA), OOP, RESTful API development, and scalable database design, with proven ability to deliver production-ready features in Agile, cross-functional teams.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, SQL
- **Frontend:** React.js, Redux, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive UI Design
- **Backend:** Spring Boot, RESTful API Design, WebSocket, JWT Authentication
- **Databases:** MySQL, MongoDB, Query Optimization, Schema Design, CRUD Operations
- **Tools & Practices:** Git, GitHub, Docker, Postman, Agile & Waterfall Methodologies, SDLC, STLC, JUnit, AI-assisted Development Tools (GitHub Copilot/ChatGPT)
- **Core Concepts:** Data Structures & Algorithms (DSA), OOP, System Design Basics, Component Design & Development, Design Patterns, Debugging, Team Collaboration

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | ExcelR

February 2026 - August 2026

- Established SDLC practices across design, development, and testing phases for 4+ Java/Spring Boot components.
- Made 15 interactive React.js screens, joining them to the server to handle 50+ daily actions..
- Finished daily full-stack tasks, completing all assignments ahead of final due dates.

Frontend Developer Intern | Indian Infotech

June 2025 - December 2025

- Built 5+ reusable React.js UI components integrated with REST APIs, boosting UI reusability by 30%.
- Optimized cross-browser rendering and load performance, improving page speed by 20% across 3 web apps.
- Collaborated with cross-functional teams to gather requirements and deliver solutions meeting technical specifications.

PROJECTS

HomeLens - Real Estate Platform

- Designed functional and technical specifications for a 50+ listing information system using scalable architecture.
- Constructed a mobile-first responsive UI with Tailwind CSS, improving cross-device rendering speed by 15%.
- Developed secure multi-parameter search REST APIs, achieving 100% uptime across 200+ test cases.

Blog Management System

- Architected a full-stack Spring Boot blogging platform supporting 200+ concurrent user sessions.
- Implemented secure CRUD operations managing data for 100+ user profiles and 500+ articles.
- Reduced front-end Accelerated page load times by 25% via code-splitting and asset optimization.

Real-Time Chat Application

- Engineered a real-time chat app with WebSocket, supporting 100+ concurrent users in room-based channels.
- Designed REST APIs and room-validation logic, enabling persistent storage for 1,000+ messages.
- Delivered a responsive UI with sub-second message delivery, boosting user interaction speed by 20%.

Tic Tac Toe Game

- Programmed a Core Java logic-based game using 2D arrays and conditionals to manage 100% of valid game states.
- Applied OOP's principles (encapsulation, abstraction) to structure the codebase, decreasing code redundancy by 30%.
- Ensured zero execution errors and accurate win/draw detection across 50+ automated test cases.

EDUCATION

United College of Engineering and Research, Allahabad

Bachelors of Technology in Computer Science and Engineering

July 2022 - May 2026

CGPA: 8.1/10

CERTIFICATION

- IBM SkillsBuild – Generative AI (Project-Based Learning): Deployed AI/ML models using 3+ real-world datasets.
- Techkriti – Backend Development Certification: Designed 5+ scalable REST APIs for production-grade systems.
- Core Java – College Summer Training: Strengthened OOP and multithreading skills via 20+ coding projects.

LEADERSHIP AND ACHIEVEMENTS

- Delivered 5+ technical presentations at college-level events and technical competitions.
- Actively sought and applied feedback from senior engineers and mentors to refine coding practices and technical approach.
